

Application No. 10/649,420

AMENDMENT TO THE SPECIFICATION

First Paragraph, Page 11:

FIGURE 5 is an elevational view of an exemplary embodiment of a gel pack. The gel packs 20 comprise a non-freezing, non-toxic, colorless, pliable gel material. The gel packs 20 are configured so that the material inside is evenly disbursed within the gel pack. As previously discussed, the gel packs 20 are shaped to the form of a breast. Having this shape will facilitate even cooling and/or warming (or heating) of an entire breast area.
